This architectural drawing shows the front elevation of a 4-car garage. The building features a combination of board & batten and lap siding. It includes a central entrance with a double door, flanked by sidelights and topped with a transom. The garage doors are also panel-style. The roof has multiple gables and is covered with asphalt shingles. Numerous windows are present, some with decorative frames. Trim details like corner trim, plate height, and window trim are shown. Vertical dimensions are provided for various sections of the building.

# 4-CAR FRONT ELEVATION

1/4" = 1'-0"

An architectural line drawing of a two-story house. The upper level features a gabled roof with horizontal siding. On the left side of the upper level, there is a small overhang supported by a single column, containing two square windows. To the right of this, there is a larger section with three rectangular windows arranged horizontally. The lower level also has horizontal siding and includes a central entrance with a double door flanked by two square windows. To the right of the entrance, there are two more square windows. The overall design is simple and symmetrical.

## 4-CAR RIGHT ELEVATION

1/8" = 1'-0"

# ROOF PLAN

1/8" = 1'-0"

An architectural line drawing of a two-story house. The main section features a gabled roof with horizontal shingles. The exterior is covered in horizontal siding. There are five windows on the upper level: a double-hung window on the left, a four-pane window next to it, and a group of three windows on the right. The lower level has four windows: a double-hung window on the far left, a four-pane window next to it, a central double-hung door, and another double-hung window on the right. A smaller gabled section is attached to the right side of the main house.

## 4-CAR REAR ELEVATION

1/8" = 1'-0"

An architectural rendering of a two-story house. The exterior features horizontal siding. The house has a gabled roof with a smaller gable on the right side. A single window is located on the left side of the second floor. A larger window is positioned on the ground floor between the two sections. A small rectangular vent is located above the window on the second floor. The right section of the house includes a stone chimney and a vertical board-and-batten section.
